Nepal Water Conservation Foundation (NWCF): Based in Kathmandu, NWCF is a nonpartisan, non-profit and non-government institution dedicated to interdisciplinary research on issues affecting the use and management of water and related natural resources, with a primary focus on the Himalaya-Ganga region. NWCF's mission is to improve understanding of water and its intrinsic function to human society and nature through interdisciplinary research (often field-based), sharing and dissemination, as well as capacity building of younger professionals. It aims to develop research capacity able to analyze water issues at local, national, regional, and international scales.

Recapitulation: In the past 107 days, the monsoon has hit 74 districts (i.e. 12th June to 20th Sep 2020).

The above map shows that the WID incidents have been reported throughout Nepal
Sources: <https://bipad.gov.np/incidents/>

Data Sources:

Most of the data were collected from the Ministry of Home Affairs Official database site (i.e. Disaster Risk Reduction Portal-DRR) and other recent published newspaper information. The floods, landslides, and thunderbolts incidents were used from the date of 14th Sep to 20th Sep 2020 for the initial loss and damage situation analysis in this bulletin.

About Bulletin: This bulletin is published on a weekly basis. The bulletin covers especially the water induced disasters throughout Nepal. The data were extracted from MoHA, newspapers, and other sources such as Radio, TV, and some data that were collected from direct phone conversations. This bulletin, disasters has categorized this include floods, landslides and thunderbolts between 14th Sep to 20th Sep, 2020. This bulletin is published to assist and inform researchers, policymakers, and others involved in DRRM.

Weekly Overview:

This year 2020 monsoon is approaching towards its end. Therefore, incidents and deaths have been reporting low. However, still, there are the uncertainties of rains that could affect several Districts of the country. The worst-hit Districts Prapat, Lamjung, Gorkha, Kalikot, Syangaj, Gulmi, Bajhang, Darchula, Bajura, Sindhupalchok, Kaski, Myagdi, and Jajarkot are still unsafe from the new incidents.

In this week incidents and deaths both are reported very low as compared to the last week.

This week Gandaki Province, Province-1, Province-2 has reported 1 death respectively, where Parbat district has a high number of deaths due to landslides.

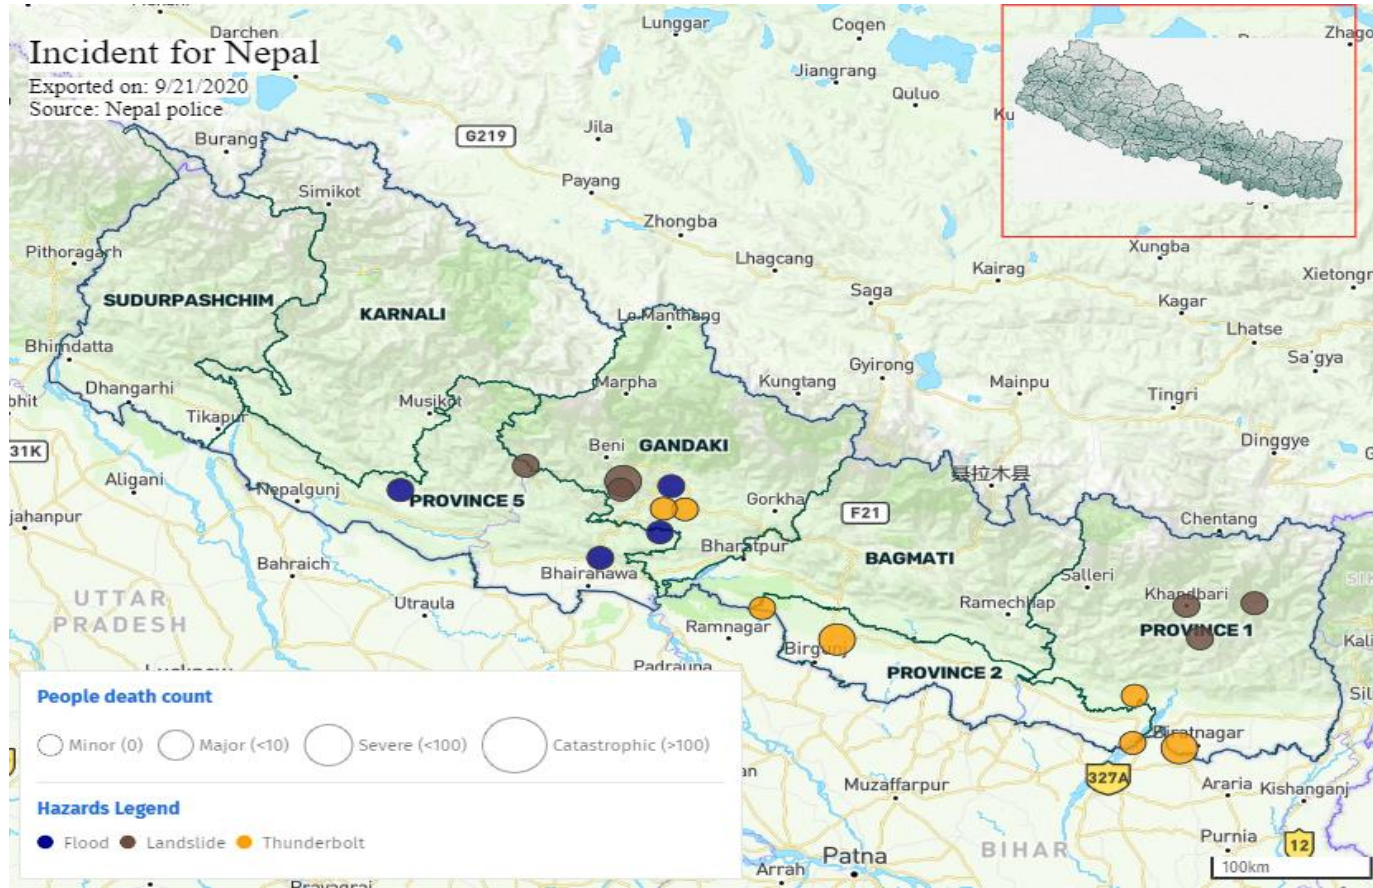

This week low rate of floods and landslides incidents were reported. However, thunderbolts incidents and its deaths are as always uncertainty.
